MYCO FUSION RELEASE THE POWER OF MYCORRHIZAE

RHIZO-CHARGE 2.0

LIVE ORGANISMS

CONTAINS NON-PLANT FOOD INGREDIENTS:

Active Ingredients:

- Trichoderma harzianum.....50 spores/gm
Humic Material
Kelp

Application Methods and Rates: This product is designed to be a companion product for the Myco-Fusion line of mycorrhizal inoculants. It contains complex humic material and other myco-symbiotic organisms. Apply immediately following planting or at any time during the plant's life cycle.

For Transplants: Apply product in the planting hole surrounding the root area. For existing plants, work mixture into top layer above roots. Following each application methodology, water thoroughly. This product works best if followed every 2-4 weeks with a drench treatment of Bio-Jolt 1-5.

Cultural Conditions: This product contains living micro-organisms that are sensitive to certain cultural practices. To avoid inhibiting or killing the organisms, do not use high rates of inorganic fertilizers, especially those with a high proportion of Phosphorus (P). Avoid application of fungicides with PCNB, thiophanatemethyl, or soil fumigants. For technical information contact the manufacturer.

Storage Conditions: Store in a cool dry place with prolonged temperatures not exceeding 90°F (32.2°C). Avoid direct sunlight. Product should be used in a well-ventilated place.
